Electric Fires Collection

Featuring our new **Optiflame^{3D}** range

Imagine the difference

Transform your home with a Dimplex electric fire.

Treat the whole family to the beauty of a real fire, but with the simplicity of electric.

Not only are our fires 100% efficient at point of use, they have a flame only setting, so can be used year round for creating a cosy room even when you don't require heating. Plus, they're independently approved to Europe's highest electrical product safety standard*.

So snuggle into your favourite armchair, relax and unwind.

*Approved or awaiting approval at time of printing

Discover the difference

Whatever your style and taste, there's a Dimplex fire to meet your dreams and match your budget. Some feature a patented 3D multi-coloured effect flame – others use the latest HDTV technology to create dancing flames and audible crackling logs. But whichever you choose, it will be the warm and comforting focal point you'd always hoped for.

Opti-V range

6-9

A virtual fireplace experience like no other.

Optimyst range

10-35

A stunning range of 3D flame effect fires.

NEW Optiflame 3D range

36-42

For the first time, a 2D effect is given 3D depth and detail.

Optiflame range

43-71

The original electric flame effect.

Surrounds

72

For use with Dimplex inset fires.

Accessories/Specifications

73-75

A range of accessories and detailed specifications for our fires.

Reassuringly Dimplex

We appreciate that choosing a new fire for your home can be an important decision, which is why you want to be able to see a variety of fires and actually touch, try and see the realism of the flame effect for yourself.

To give you every confidence that you're buying the right fire, we've created a network of Dimplex retailers around the country, each with a range of fires on display. They'll be happy to guide you through all the different options available as well as demonstrating a selection of fires in operation in their showrooms.

Our retailers are your guarantee of the expert advice and individual customer service you can expect from Dimplex.

Dimplex Centres have a minimum of **four** fires on display including at least **one** from our Optimyst range.

Dimplex CentrePlus retailers have a minimum of **seven** fires on display including at least **three** from our Optimyst range.

3-Year Guarantee

Wherever you see this logo in this brochure, it means that when you buy the fire featured from a Dimplex Centre or CentrePlus retailer, you are entitled to a free upgrade from our standard 1-year guarantee to a 3-year guarantee. To take advantage of this, simply complete the online registration within 28 days of purchase at www.dimplex.co.uk/register, or call us on **0344 879 3588** if you do not have access to the internet. Products must be installed in accordance with the manufacturer's instructions and maintained in line with the Terms & Conditions, which are available at www.dimplex.co.uk/terms.

Safety First

All Dimplex fires are BEAB approved* - this means they are independently approved to Europe's highest electrical product safety standard.

*Approved or awaiting approval at time of printing

The most unbelievable electric flame effect yet

Opti-V

Opti-V is unlike any other electric flame effect fire. Its flickering flames dart and dance amongst glowing logs that crackle and spark yet never burn away. Discreet LED lighting glimmers deep in each log adding to their extraordinarily realistic appearance. Driven by the high definition technology usually employed in TVs, you're actually basking in the glow of a real live fire created in your fireplace by the magic of virtual reality.

See a video of the flame effect for yourself at dimplex.co.uk/optiv

PGF20

CLL-OV Cellini

Deceptively Real

The logo for Optimyst, featuring a stylized flame icon to the left of the word "Optimyst" in a serif font.

An Optimyst fire will captivate you from the moment you see it.

The Optimyst effect utilises established ultrasonic water mist technology to create an authentic, three dimensional flame and smoke effect – an illusion so realistic that it is difficult to distinguish from the real thing. As the mist rises up through the logs, the light reflects against the water, creating a convincing illusion of a real fire.

See a video of the flame effect for yourself at dimplex.co.uk/optimyst

Optimyst Bespoke

Dimplex's Optimyst Bespoke range offers design flexibility only matched by your imagination and has been specifically developed for anyone seeking to create a unique statement fireplace in their home.

The range is available in either cassette or chassis design and all feature the Optimyst effect.

Optimyst cassettes can be the vital ingredient for creating an individual piece of bespoke furniture or an eye-catching focal point.

Alternatively an Optimyst chassis can be used within a surround to produce a stunning fireplace suite. In fact, the possibilities are endless – and are just waiting for your designs.

Optimyst Bespoke fires create opportunities that would not be available with gas or solid fuel because of safety issues or unwelcome heat – such as embedding the fire in the wall directly below large flat screen televisions, or in a bedroom. Alternatively the products can be fitted into a bespoke surround to produce a stunning suite.

Optimyst Bespoke – catering for anyone looking to create a truly individual statement, utilising the world's best in electric flame installation.

Optimyst Bespoke – design flexibility only matched by imagination

See pages 73 to 75 for product dimensions

MFD20 Moorfield

Indulgence range

Create the perfect retreat in your home with a sumptuous fireplace surround that frames an Optimyst fire to create a complete fireplace.

This exclusive range of fireplace suites is presented in three designs, with a choice of inset or outset, and four materials to allow you to create the perfect fireplace for your home.

The Indulgence range is only available from selected retailers. Please see our website for your nearest dealer.

Please note:
Limestone and marble are porous – do not put glasses or cups directly onto it as they will mark. Natural markings (e.g. fossils, coal flecks) are always present in limestone.

1 Select from three stunning designs:

- The graceful blend of sharp lines and soft curve of Antigua
- The simple modernist elegance of Bali (available with or without shelf option)
- The refined, traditional styling of Mustique

2 Select installation type:

Indulgence suites support both outset or inset installations. When opting for the latter installation the Optimyst fire can be inset into the wall, providing a sleeker look to the Indulgence surround. Outset enables the actual suite to be placed flat to the wall.

Outset

Inset

3 Finally, choose your material. Dimplex offers a choice of four polished micro-marble materials:

- Crema Rosa, a warm mocha marble with hints of autumnal colour playing through its interlocking mosaic of crystals
- Crème Sion, captures the romance of the Italian Alps with a smoky matrix of dolomitic crystals and sparks of sharp, bright colour throughout
- Polari, emulates the classical purity of white Aegean marbles
- The fourth option is Portuguese Limestone. Used for centuries, this fine grained stone brings a cool and subtly natural finish to your fireplace

Introducing the new Optiflame 3D

We've revamped our Optiflame technology to deliver our most advanced and luxuriously designed fires, with the new Optiflame 3D range. Optiflame 3D gives the power of choice. Using the state-of-the-art remote you can add a blue flame for cool, calm vibes or choose a deep orange for a glorious glow. Or adjust the down lighting to enhance the drama. You can even pick beautiful crystals, realistic logs, coal and pebbles to enrich the luminosity of your own unique fuel bed*.

We know that creating the finest electric fires is as much about the flame as it is the feel – therefore, the Optiflame 3D will leave you with toasty toes, while the warm glow makes rooms alluring and restful.

The UK's most popular electric flame effect

Optiflame

Optiflame is the original Dimplex electric flame effect that revolutionised the market when first launched in 1988.

Endlessly refined over the years to become the UK's most popular electric flame effect, you can experience its realistic glow year round simply by switching on the 'flames' without the heating. So you can enjoy their comforting cosiness on mild but gloomy spring mornings or on dark autumn evenings.

See a video of the flame effect for yourself at dimplex.co.uk/optiflame

Ellister

This new chrome effect inset fire, has lovely brass detailing to the front to bring a contemporary feel to the classic inset fire design.

Installation guidance

This brochure is not intended as an installation guide. For safety, products should only be installed by a suitably qualified professional, in accordance with current regulations and the manufacturer's instructions. All limestone and marble fireplaces are heavy and must be fixed by mechanical means to the structure of the wall. It is the installer's responsibility to ensure a strong and lasting fix can be made. If you require further advice concerning the installation of our products - especially where the installed dimensions may be critical to your choice and the location of the product - please consult the installer.
